Subject: Genetic Engineering Labeling

Sensitivity: Personal

I'm sure there is no reason to recount any of the data I've been reading about genetically engineered foods....you have more than I've read.

However, I would like to BEG YOU TO LABEL THESE FOODS!

We, the consumers, have a right to know what we are eating. That's been the reason for all labeling laws and should not stop with this.

It is possible that it is not safe! I want to know that if I buy it, I will be responsible for it....it should certainly save you money from law suits in the future!

Thank you for considering my plea for TRUTH!
